

DO ANY OF THESE LOOK LIKE YOU?

THEY DON'T REACT LIKE YOU EITHER.

N H S : the sixty-year legacy of *Modern Medicine*

In 1948, a group of well-meaning but seriously misinformed individuals founded the British National Health Service in the belief that the public's easy access to the rapidly-emerging Wonders of Modern Medicine would lead to a healthy nation and reduced NHS spending. In 1950, the NHS cost around £350 million : the monetary-inflationary equivalent of this, today, is less than £9 billion .

In 2008, the national disease money-pit will swallow up in excess of £100 BILLION.

£ 1 0 0,0 0 0,0 0 0,0 0 0.

The nation's health is the worst it has been for sixty years, having deteriorated constantly and remorselessly since day-one.

The last GP morbidity statistics figures showed a rise of 85% in serious illness in children in ten years.

Almost one fifth of people of working age in the UK are disabled. According to the Office for National Statistics - Living in Britain survey , 2004, - 1 in 6 children under-5 now suffer from a long-standing illness, compared with one in 25 in 1972 : chronic conditions have increased among 5 to 15-year-olds, from 1 in 12, 30 years ago to 1 in 5 in 2002 a quarter of people aged 16 to 44 now suffer from a long-term illness ...

Birth defects rose by 50% in the 5 years to 2002.

In 2002, 1 in every 16 babies born in rural mid Devon had at least one defect compared with less than 1 in 630 babies born in Islington. Why ?

BECAUSE ISLINGTON IS NOT CHOKED WITH **ANIMAL-SAFETY-TESTED** PESTICIDES AND HERBICIDES.

Stillbirths and first-week deaths have risen to over 5,300 per year. 50,000 premature babies are born, annually.

Over 1 billion prescriptions are now given out per year with 22 million people on repeat prescriptions.

We have tens of thousands of new diseases. 40% - and rising - of the population have or will develop cancer...

As there is nothing wrong with the concept of a nationalised health facility, this leaves the practice :

Modern Medicine :

antipathic medicine ; allopathic medicine : the medicine of symptom suppression and removal with the petro-synthetic drug, radiation and the knife : the medicine of the opposites ; of antidepressives, antihypertensives, antipyretics, anticoagulants, antivirals : the medicine of *The War on Disease* ; using the human body as a passive battlefield, trashed in the process : the medicine of the bug-hunters and their *Germ Theory* and a trillion dollar empire of vaccines, antibiotics, antiseptics, antibacterials and disinfectants ; all with catastrophic consequences for human health and immunity and the environment.

Consensus Medicine to avoid litigation : medicine by the book, whatever the consequences to the public.

the medicine of *safety and efficiency tests* on rodents, dogs, cats, goats, fish .. whatever

Modern Medicine would not survive in a court of science if it were ever so foolish as to enter such a place but it is not required to do so. Apart from its political friends, a small army of transparent on-the-payroll media plants, trying to pass themselves off as "science editors", "medical correspondents", "health writers" provide a regular supply of "medical breakthroughs" and regular attacks on what they call "alternative medicine."

£100 billion per year but YOU have to pay privately for safe, effective treatments which work WITH the body's inherent healing ability : the ONLY way to become well.

The *Dept. of Health* recommends, allows, fails to condemn virtually every health-destructive aspect of modern living : meat, dairy, refined carbohydrates, pesticides, herbicides, vaccines, X-ray screening, microwave ovens, mobile phones, fluoride, aerosol air-fresheners, colourants, preservatives, aspartame, MSG

This government wants more screening, more vaccination and "new drugs and technologies" :

putting out the fire with petrol.

However, it is not just direct human damage ...

We have dead rivers, lakes, areas of the planet ... due to the deluge of medical, industrial, military and agricultural synthetics.

The vivisectioners are, literally, costing us the Earth .
